***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of curing adhesive between substrates, classified in class 156.
- II. Claims 11-22, drawn to an apparatus for bonding disk substrates, classified in class 156.
- III. Claims 23-32, drawn to an apparatus for bonding disk substrates, classified in class 156.
- IV. Claims 33-39, drawn to an apparatus for bonding disk substrates, classified in class 156.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and Inventions II-IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as curing a coating rather than an adhesive.

Inventions II and III and IV are distinct apparatus combinations. Each invention relies on different elements for patentability not required by the other. Invention II requires a semiconductor light emitting apparatus whereas Inventions III and IV do not. Invention III requires a tacking mechanism whereas Inventions II and IV do not.

Art Unit: 1733

Invention IV requires a disc mounting stage with a centering mechanism whereas Inventions II and III do not.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and each Group requires a search not required of the other, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Anoton Skaugset on 8/11/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1733
